GetYourAIPrompt: UI/UX & Content Blueprint

Prepared for: Development & Product Strategy Team
Focus: AI Video Prompts (Commercial, Cinematic, Gemini, Flow AI)

PROJECT CONTEXT & BUSINESS MODEL (FOR DEVELOPER AI)

What We Do: GetYourAIPrompt is a specialized AI video prompt marketplace. We provide users with ready-made, highly engineered text prompts designed specifically to generate commercial product videos, e-commerce ads, and cinematic storytelling clips.

Core Technologies: The prompts on this platform are strictly optimized for **Gemini** and **Flow AI**.

Monetization & UX Constraint: The platform is free for users and supported entirely by display advertising. Therefore, the UI must beautifully balance high-end cinematic aesthetics (dark mode, glassmorphism) with strategic, non-intrusive ad placements. Ads must never break the grid layout, obscure the video thumbnails, or block the "Copy Prompt" functionality.

Part 1: Global Design System Specifications

The website must utilize a "Cinematic Dark Mode" to make the vibrant AI video thumbnails and prompt texts stand out against the UI. Avoid heavy drop-shadows; rely on flat surfaces with subtle 1px borders.

Role	Color/Value	Usage Notes
Background	#0B0C10	Deep Charcoal. Main page background for reduced eye strain.
Surface/Cards	#1F2833	Elevated Dark Slate. Use for prompt cards, modals, and input fields.
Primary Action	#45A29E	Digital Teal. Use for primary buttons like "Copy Prompt".
Secondary/Hover	#66FCF1	Neon Cyan. Use for link hovers, active states, and subtle glowing borders.
Text Primary	#FFFFFF	Pure White. Use for H1-H4 headings.
Text Secondary	#C5C6C7	Soft Silver. Use for body text, paragraphs, and metadata.
Typography	Space Grotesk & Inter	Space Grotesk for headings (modern/tech). Inter for body. Fira Code for prompt output blocks.
Radius & Spacing	12px & 8px grid	12px border radius for main cards and thumbnails. Use 8px spacing increments.

Part 2: Page-by-Page Layout & Content

1. Home Page

Layout Structure:

- **Global Header:** Sticky top. Logo left. Search bar center ("Search cinematic prompts..."). Links right: Browse, Categories, Submit Prompt.
- **Hero Section:** Center-aligned text over a darkened, looping video background (or subtle gradient mesh).
- **Featured Categories Grid:** 3-column grid showcasing core styles.
- **Ad Placement:** One full-width banner advertisement inserted between Categories and Trending.
- **Trending Prompts Grid:** 4-column grid of top video prompts.

HERO SECTION CONTENT

Studio-Quality AI Video, Powered by Perfect Prompts. Copy and paste proven, commercial-grade video prompts optimized for Gemini and Flow AI. Stop guessing and start generating cinematic results. Browse Prompts View Top Categories

Headline (H1):Subheadline (H2):Primary Button:Secondary Button:

HOW IT WORKS (3-COLUMN ROW CONTENT)

Step 1: Find your style. Search our library of commercial AI video structures and cinematic formulas. **Step 2: Copy the prompt.** Get the exact camera movements, lighting cues, and pacing structures with one click. **Step 3: Generate.** Paste into Gemini or Flow AI to produce your commercial in minutes.

2. Prompt Library / Browse Page

Layout Structure:

- **Page Header:** H1 "Prompt Library". Total prompt count dynamically displayed.
- **Filter Bar (Top):** Dropdowns for: AI Model (Gemini, Flow AI), Aspect Ratio (16:9, 9:16), Style (Cinematic, Commercial, Product Macro, Social).
- **Video Grid:** Standardized cards containing: Video Thumbnail (16:9), Title, Model Tags `Gemini` , and Author. Hovering over a card silently autoplays the video preview.
- **Ad Placement:** Insert a "Native Grid Ad" every 8th item. It must match the exact dimensions of a prompt card but be marked clearly with "Advertisement".

3. Prompt Detail Page (The Core Tool)

Layout Structure: Split-screen (or 60/40 column split) for desktop.

- **Left Column (Output Preview):** Large video player showcasing the generated result. Below the video, list metadata: Aspect Ratio, Resolution, Duration, and AI Model Used.
- **Right Column (The Prompt):** H1 Title. A brief description of the technique (e.g., "Uses a dolly-zoom to emphasize the product").
- **Prompt Container:** A distinct `#1F2833` box displaying the monospaced text. A massive, primary-colored "Copy Prompt" button sticky at the bottom of this box. Clicking it changes the text to "Copied!" and turns the button green briefly.

- **Ad Placement:** A 300x250 medium rectangle ad placed directly below the prompt container in the right column.

Part 3: Legal & Company Pages (Ready for Injection)

Create dedicated routes for these pages. Use a narrow, readable 1-column layout (max-width: 800px) with standard typography.

1. About Us

> PAGE CONTENT
>
> **Headline:** Empowering Creators with Commercial AI Prompts **Body:** GetYourAIPrompt was built for marketers, filmmakers, and creators who need studio-quality video without the studio budget. The secret to great AI video isn't just the AI model itself—it's the prompt. We curate, test, and refine commercial and cinematic prompts optimized specifically for industry-leading models like Gemini and Flow AI. Whether you are generating a 15-second product ad, a 3D e-commerce render, or a cinematic narrative sequence, our library gives you the exact camera movements, lighting cues, and pacing structures needed to get reliable, professional results. Our mission is to take the guesswork out of generative video and give you the blueprints to create instantly.

2. Contact Page

Layout: Split screen. Left side contains the copy below; right side contains a form (Name, Email, Subject Dropdown, Message, Submit).

LEFT COLUMN CONTENT

Get in Touch with Our Prompt Engineers

Whether you have a question about a specific cinematic formula, want to submit a highly effective prompt you've discovered, or are looking to partner with us for brand advertising, our team is here to help.

Fill out the form, and a member of our team will get back to you within 24-48 hours.

We provide the text-based prompt blueprints. We do not provide technical support, API troubleshooting, or account assistance for third-party platforms like Google Gemini or Flow AI. If your video generation fails on those platforms, please consult their respective support documentation.

- Full Name (Text Input)

- Email Address (Email Input, Required)

- Subject (Dropdown: General Inquiry, Prompt Submission, Advertising/Sponsorship, Report an Issue)

- Message (Textarea, min 4 rows)

- Submit Button ("Send Message")

"Thank you! Your message has been sent. We'll be in touch soon."

3. Terms of Service

PAGE CONTENT

[Insert Current Date]

By accessing and using GetYourAIPrompt.com ("the Website"), you accept and agree to be bound by the terms and provisions of this agreement. If you do not agree to abide by these terms, please do not use this Website.

GetYourAIPrompt provides a curated repository of text-based prompts intended for use with third-party generative AI platforms (including, but not limited to, Google Gemini and Flow AI) to create commercial, product, and cinematic video content.

The prompts provided are intended as structural guidelines. We do not guarantee the final video output, as AI generation involves algorithmic variance and randomness. Results may differ based on updates to third-party models, platform limitations, or your specific usage tiers. The prompts are provided "as-is" without warranty of specific results, merchantability, or fitness for a particular purpose. We are not liable for any financial loss or production delays caused by the use of our prompts.

Users are strictly responsible for complying with the Terms of Service, Acceptable Use Policies, and licensing agreements of the respective AI platforms (e.g., Gemini, Flow AI) where they execute our prompts. GetYourAIPrompt is an independent entity and is not officially affiliated with, endorsed by, or sponsored by Google or Flow AI. You agree not to use our prompts to generate illegal, non-consensual, or highly restricted content as defined by the respective AI platforms' safety guidelines.

Part 4: Developer Handoff Instructions

Pass these direct instructions to Claude, Antigravity, or your primary development AI to execute the codebase changes without breaking functionality:

1. **Global CSS Reset:** Implement the HEX codes from Part 1 into the `:root` variables. Apply a dark mode reset to the `body` background. Ensure all text colors update to high-contrast white/silver.
2. **Component Updates:** Update the main `PromptCard` component. Ensure it uses a 12px border radius, a 1px solid border (`rgba(255,255,255,0.1)`), and implement a hover transition that removes standard drop-shadows in favor of a subtle `box-shadow` neon glow matching the secondary color.
3. **Detail Page Refactor:** Rewrite the Prompt Detail layout to use CSS Grid/Flexbox for a left-right split. Implement the Clipboard API on the "Copy Prompt" button with a 2-second timeout that resets the button text from "Copied!" back to "Copy Prompt".
4. **Static Routes:** Create standard static views for `/about`, `/contact`, `/terms`, and `/privacy`. Inject the exact text blocks provided in Part 3 above. Wrap the text in a standard container with `max-width: 800px` and `margin: 0 auto` for readability.
5. **Ad Component Wrappers:** Create an `<AdSlot />` component that safely catches ad-network scripts. For the grid view, style the wrapper to match the exact height and width of a `PromptCard` to prevent layout shifting (CLS) when the ad loads.
